I'm starting the 7-Day DevOps challenge!

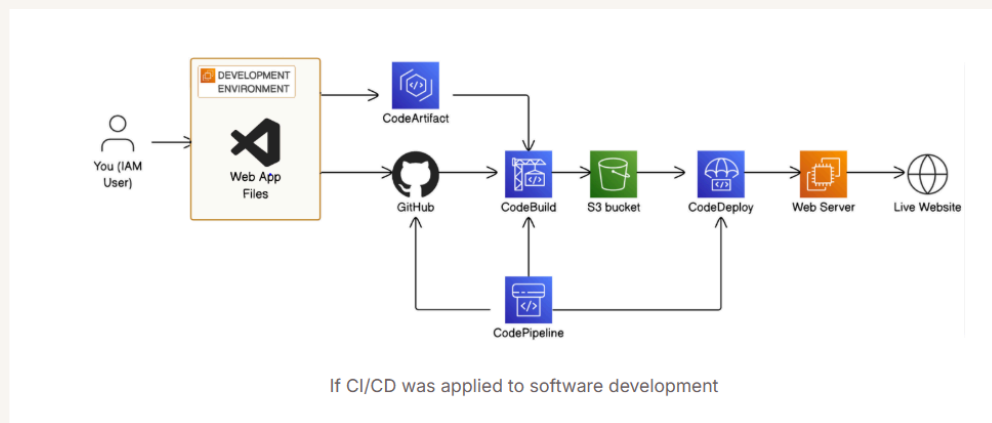

mohankrishnan802@gmail.com

I'm building a CI/CD pipeline in 7 days

In this DevOps challenge, I'm learning about the CI/CD lifecycle—source control, builds, tests, IaC, containers, deployment, monitoring. By the end of 7 days, I will have a production-ready pipeline.

Hold me accountable!

I will set aside 45 minutes every day for a week to work on this challenge. I will keep myself accountable by marking tasks on a Trello board. My reward for completing this DevOps challenge will be movie night.

What is DevOps?

DevOps is methodology that bridges development and operations, accelerating delivery and reliability. DevOps engineers implement CI/CD pipelines, infrastructure as code, automated testing, proactive monitoring.

What is CI/CD?

CI/CD stands for Continuous Integration and Continuous Deployment. This process helps teams by automating code merges, testing and deployments, enabling more rapid reliable releases with quality and efficiency.
